EXPERIENCE

Microsoft
Software Engineering Intern - One Customer Voice Team

📅 June 2019 – August 2019   📍 Redmond, WA

- Improved item grouping for the internal feedback aggregation tool
- Defined project scope and requirements within a tech spec and documented UI and backend changes in a design doc
- Exposed all previously hidden top level fields and automatically detected field type via ElasticSearch mappings, greatly increasing both the granularity and flexibility for users
- Implemented frontend, backend, and tests with 100% backend code coverage

Tools: C#, ASP.NET, Azure Service Fabric, ElasticSearch, AngularJS

Microsoft
Software Engineering Intern - Office Security Penetration Testing Team

📅 June 2018 – August 2018   📍 Redmond, WA

- Automated resource gathering, provisioning, and deployment of fuzzing jobs
- Developed a PowerShell script to create a Windows VM, automatically install Office, gather debugging symbols for Office, and send these to a Microsoft Security Risk Detection server to install and start a fuzzing run
- Implemented a server to collect, deduplicate, and report new bugs
- Worked closely with the Microsoft Security Risk Detection team to help improve the job deployment process while the tool was in interal beta

Tools: PowerShell, Microsoft Security Risk Detection, Azure, ASP.NET

PROJECTS

GenericBot
○ **https://github.com/galenguyer/GenericBot**

- Built a Discord bot to provide moderation tools and fun commands to over 50 servers totaling over 16,000 users
- Used C# to connect to Discord's API and store all user data in an encrypted, self-hosted MongoDB instance
- Exposed user-stored quotes via a webpage ASP.NET Razor Pages for server-side rendering and JavaScript for fast, responsive search

Tools: C#, MongoDB, ASP.NET, Razor Pages, HTML/CSS/JS, Azure Build Pipelines

PhotoSink
○ **https://github.com/galenguyer/PhotoSink**

- Re-wrote the lightweight photo gallery PhotoFloat, using modern technologies
- Used a python3 backend to construct the directory indexes and resize images into thumbnails for faster page loads
- Built a React app that requests the indexes and displays the gallery with thumbnails and folder names
- Used the url fragment for single page navigation so the full page doesn't need to be reloaded on navigation

Tools: Python, React, NGINX

EDUCATION

Rochester Institute of Technology
Software Engineering B.S.

📅 Expected Graduation May 2024

SKILLS

Languages

C# | Python | PowerShell | Rust | HTML/CSS | JavaScript | TypeScript | Java | PHP

Tools

Azure | NGINX | Linux | Git | GitHub | Docker | Docker Compose | Traefik | Bash | MongoDB | React | Flask | Ansible

ACTIVITIES

Computer Science House
Systems Administrator

📅 April 2020 - Present

Maintain House Services such as the student-run server room and all services within it, including virtual machine and user profile management portals

Accessibility Learning Labs
Software Engineer

📅 May 2020 - August 2020

Worked in a federally funded research program to develop React apps to demonstrate the importance of accessible software to students and developers

Society of Software Engineers
Public Relations

📅 December 2019 - May 2020

Coordinated company visits and tech talks throughout the semester

Boy Scouts
Eagle Scout

📅 September 2017

Achieved Boy Scouts' highest rank after earning 26 merit badges and designing, coordinating, and leading a 100+ hour service project
